

# VIZHIYARASU SAMPATH

## SOFTWARE DEVELOPMENT ENGINEER IN TEST (SDET)

103 Pampaliyar Street, Edakeelaiyur, Mannargudi, Thiruvavur (DT) - 614013, Tamil Nadu, India | vizhiekr@gmail.com | +91 80982 34425

### PROFESSIONAL SUMMARY

Results-driven SDET with 1.8+ years of experience delivering quality across SaaS and ERP products, spanning manual testing, test automation, AI-assisted testing, and frontend development. Currently engineering frontend features and driving end-to-end quality for Aveli (cybersecurity SaaS), Vruksha (real estate ERP), Varai (ERP), and Eythio (task management platform) at Arivar Techlabs Private Limited (Yakkaspace Group), Thanjavur. Owns the full testing lifecycle — requirement analysis, test design, execution, regression, and defect tracking — using Katalon Studio, Jira, and Bugasura, backed by hands-on proficiency in HTML5, CSS3, JavaScript, React.js, and Next.js, plus foundational, basic-level exposure to security testing tools (OWASP ZAP, Burp Suite). Strategically leverages Claude Code, GitHub Copilot, and ChatGPT to accelerate test generation, automation, debugging, and documentation — consistently raising delivery speed without compromising quality.

### CORE SKILLS

|                                |                                                                                                                     |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------|
| Languages & Frameworks         | HTML5, CSS3, JavaScript, React.js, Next.js, Tailwind CSS, WordPress                                                 |
| Databases                      | MySQL, RDBMS, JSON                                                                                                  |
| Testing & Automation           | Manual Testing, Katalon Studio, Selenium, AI-Assisted Automation, Functional/Regression/Integration/API/UAT Testing |
| Security Testing (Basic Level) | OWASP ZAP, Burp Suite, OWASP Top 10 — foundational exposure                                                         |
| Tools & Platforms              | Git, GitHub, GitHub Actions, Jira, Bugasura, Postman, VS Code, MCP Tools                                            |
| AI Tools                       | Claude Code, GitHub Copilot, ChatGPT, Antigravity                                                                   |
| Soft Skills                    | Problem-Solving, Teamwork, Adaptability, Ownership                                                                  |

### PROFESSIONAL EXPERIENCE

Software Development Engineer in Test (SDET) | Arivar Techlabs Private Limited (Yakkaspace Group), Thanjavur

Apr 2026 – Present

- Engineer frontend features using React.js, Next.js, HTML5, CSS3, JavaScript, and Tailwind CSS, working in close partnership with developers.
- Own functional, regression, integration, API, and UAT testing across SaaS and ERP products, safeguarding release quality.
- Drive automation execution and maintenance in Katalon Studio to strengthen regression coverage.
- Accelerate test generation, automation scripting, and documentation by strategically leveraging Claude Code, ChatGPT, and GitHub Copilot.
- Review and validate AI-generated Playwright and Selenium scripts, refining automation workflows for reliability.
- Manage bug tracking and cross-team workflows using MCP tools, ensuring fast defect turnaround.
- Validate bug fixes and support unit testing to maintain product stability.

Associate Quality Engineer | Arivar Techlabs Private Limited (Yakkaspace Group), Thanjavur

Oct 2025 – Mar 2026

- Delivered manual and AI-assisted testing across SaaS and ERP products, strengthening test coverage.
- Designed test cases, test data sets, and regression suites aligned to product requirements.
- Accelerated documentation, debugging, and test generation using ChatGPT, Claude, and GitHub Copilot.
- Supported frontend validation and application development activities alongside the engineering team.
- Maintained defect logs and drove release validation to ensure on-time, quality-checked launches.

Junior Quality Engineer | Yakkaservices Private Limited (Yakkaspace Group), Thanjavur

Nov 2024 – Sep 2025

- Owned end-to-end manual testing for SaaS, ERP, and web/mobile applications, including the 25YearsMore social and career platform.
- Executed the full testing lifecycle — requirement analysis, test case design, execution, regression testing, and defect tracking — using Jira and Bugasura.
- Built and maintained automation test scripts in Katalon Studio, boosting overall testing efficiency.
- Validated UI behavior and debugged issues using HTML, CSS, JavaScript, and React.js.
- Tested across web and mobile platforms, confirming performance, responsiveness, and usability standards.
- Conducted basic, foundational-level security testing with OWASP ZAP and Burp Suite to flag common vulnerabilities.
- Applied AI tools (ChatGPT, GitHub Copilot, Claude, Antigravity) to speed up test case creation, debugging, and requirement documentation.

KEY PROJECTS

---

**Eythio — Task Management Platform** — *Frontend Developer & Software Tester*

- Built responsive UI components using React.js, Next.js, HTML5, CSS3, JavaScript, and Tailwind CSS; used Claude Code for feature development, refactoring, and debugging.
- Performed functional, regression, integration, and UAT testing; tracked and verified defects with developers.

**Varai — ERP Application** — *Frontend Developer & Software Tester*

- Developed frontend modules and converted requirements into user stories using Claude Code, ChatGPT, and GitHub Copilot.
- Created manual test cases, regression suites, and AI-assisted automation scripts; supported API and UI validation.

**Aveli — SaaS Cybersecurity Product** — *Software Tester*

- Performed end-to-end manual testing for cybersecurity SaaS modules, validating functionality and workflows, with basic-level security testing support.

**Vruksha — Real Estate ERP Application** — *Software Tester*

- Performed requirement analysis, functional/regression testing, and defect management; created user stories and test data using Claude.

**25YearsMore — Social Networking & Community Platform** — *Software Tester*

- Performed end-to-end manual testing, verifying UI behavior and business logic; logged and tracked defects using Jira and Bugasura.

INTERNSHIPS & TRAINING

---

**Web Development Intern** | *Yakkaservices (Yakkaspace)*

Jul 2024 – Oct 2024

- Worked on modern web development using React.js, Next.js, Tailwind CSS, and Supabase.
- Built and tested responsive UI components; assisted in frontend development and debugging.

**Web Development Trainee / Intern** | *SAIO*

Oct 2023

- Completed training in HTML, CSS, JavaScript, React.js, and WordPress (Oxygen Builder).
- Developed interactive UI components; achieved 96% in the final assessment.

**Java Development Intern** | *Shiash Info Solutions Pvt. Ltd.*

Apr 2022 – Jun 2022

- Worked with the technical team on Java-based development tasks, gaining core Java and application development fundamentals.

EDUCATION

---

- Full Stack Development Certification — 6-month Front-End Web Development training, Besant Technologies, Chennai (Velachery).
- Diploma in Cinema Editing and Visual Arts — PALME-DEOR Film and Media College, Thanjavur — 89% aggregate, 2020.

ACHIEVEMENTS

---

- Improved test coverage across critical modules through effective test case design and execution.
- Reduced release-cycle defects by identifying and addressing issues early in testing.
- Enhanced testing efficiency by implementing automation using Katalon Studio.
- Successfully managed multiple concurrent projects (Aveli, Vruksha, Varai) ensuring timely delivery and quality.
- Promoted from Junior Quality Engineer to Associate Quality Engineer to SDET within 18 months.
