

VIZHIYARASU SAMPATH

AI-ASSISTED SDET • MANUAL & AUTOMATION TESTING • PROMPT ENGINEERING

Thanjavur, Tamil Nadu, India | vizhiekr@gmail.com | +91 80982 34425

PROFESSIONAL SUMMARY

Results-driven SDET with 2+ years of experience delivering quality across 3 concurrent SaaS and ERP products, spanning manual testing, test automation, AI-assisted testing, and frontend development. Promoted 3 times in 18 months — from Junior Quality Engineer to Associate Quality Engineer to SDET — at Arivar Techlabs Private Limited (Yakkaspace Group), Thanjavur, currently engineering frontend features and driving end-to-end quality for Vruksha (real estate ERP), Varai (ERP), and Eythio (task management platform). Owns the full testing lifecycle — requirement analysis, test design, execution, regression, and defect tracking — using Katalon Studio, Jira, and Bugasura, backed by hands-on proficiency in HTML5, CSS3, JavaScript, React.js, and Next.js, plus foundational, basic-level exposure to security testing tools (OWASP ZAP, Burp Suite). Strategically leverages 3 AI tools — Claude Code, GitHub Copilot, and ChatGPT — to accelerate test generation, automation, debugging, and documentation, consistently raising delivery speed without compromising quality.

CORE SKILLS

Languages & Frameworks	HTML5, CSS3, JavaScript, React.js, Next.js, Tailwind CSS, WordPress
Databases	MySQL, RDBMS, JSON
Testing & Automation	Manual Testing, Katalon Studio, Selenium, AI-Assisted Automation, Functional/Regression/Integration/API/UAT Testing
Security Testing (Basic Level)	OWASP ZAP, Burp Suite, OWASP Top 10 — foundational exposure
Tools & Platforms	Git, GitHub, GitHub Actions, Jira, Bugasura, Postman, VS Code, MCP Tools
AI Tools	Claude Code, GitHub Copilot, ChatGPT, Antigravity
Soft Skills	Problem-Solving, Teamwork, Adaptability, Ownership

PROFESSIONAL EXPERIENCE

Software Development Engineer in Test (SDET) | Arivar Techlabs Private Limited (Yakkaspace Group), Thanjavur Apr 2026 – Present

- Fast-tracked through 3 promotions (Junior QE → Associate QE → SDET) within 18 months, reflecting consistent ownership of quality outcomes.
- Engineer frontend features, working in close partnership with developers.
- Own functional, regression, integration, API, and UAT testing across 3 SaaS and ERP products (Vruksha, Varai, Eythio), safeguarding release quality.
- Drive automation execution and maintenance in Katalon Studio across the full regression suite to strengthen coverage.
- Accelerate test generation, automation scripting, and documentation by strategically leveraging 3 AI tools — Claude Code, ChatGPT, and GitHub Copilot — for prompt-driven testing and development.
- Review and validate AI-generated Playwright and Selenium scripts, refining automation workflows for reliability.
- Manage bug tracking and cross-team workflows using MCP tools, ensuring fast defect turnaround.
- Validate bug fixes and support unit testing to maintain product stability.

Associate Quality Engineer | Arivar Techlabs Private Limited (Yakkaspace Group), Thanjavur Oct 2025 – Mar 2026

- Delivered manual and AI-assisted testing across 3 SaaS and ERP products, strengthening test coverage.
- Designed test cases, test data sets, and regression suites aligned to product requirements.
- Accelerated documentation, debugging, and test generation using 3 AI tools — ChatGPT, Claude, and GitHub Copilot.
- Supported frontend validation and application development activities alongside the engineering team.
- Maintained defect logs and drove release validation across multiple release cycles to ensure on-time, quality-checked launches.

Junior Quality Engineer | Yakkaservices Private Limited (Yakkaspace Group), Thanjavur Nov 2024 – Sep 2025

- Owned end-to-end manual testing for SaaS, ERP, and web/mobile applications, including the 25YearsMore social and career platform.
- Executed the full testing lifecycle — requirement analysis, test case design, execution, regression testing, and defect tracking — using 2 defect-tracking platforms (Jira and Bugasura).
- Built and maintained automation test scripts in Katalon Studio, boosting overall testing efficiency.
- Validated UI behavior and debugged issues using HTML, CSS, JavaScript, and React.js.
- Tested across both web and mobile platforms, confirming performance, responsiveness, and usability standards.
- Conducted basic, foundational-level security testing with OWASP ZAP and Burp Suite to flag common vulnerabilities.

- Applied 4 AI tools (ChatGPT, GitHub Copilot, Claude, Antigravity) to speed up test case creation, debugging, and requirement documentation.

KEY PROJECTS

Eythio — Task Management Platform — Developer & Tester

Unified release planning, sprint execution, and bug-tracking platform with built-in cost intelligence.

- Built responsive UI components for the Kanban, Gantt, and Dashboard views; used Claude Code for feature development and debugging.
- Tested release planning, sprint execution, and cost-tracking workflows across the Dashboard, Kanban, Gantt, and Reports modules.
- Verified test case management, bug tracking, and time-logging features, tracking defects with developers before each release.
- Validated role-based access control (RBAC) and audit-log accuracy across workspace-level permissions.

Varai — ERP Application — Developer & Tester

SaaS platform for sales, project, and operations management — built for system integrators, main contractors, and consultants in the construction industry.

- Developed frontend modules for authentication, bid-to-project conversion, and multi-region/currency workspace setup flows.
- Converted PRD requirements into user stories across the sales pipeline, drafting task management, and project/bid modules.
- Created test cases and automation scripts covering signup, sign-in, forgot-password, and role-based access across Admin, Project Manager, and Drafting Manager roles.
- Validated Outlook mail sync and file storage/conflict-resolution features against project and organisation workflows.

Vruksha — Real Estate ERP Application — Tester

Real-estate business control system for partnerships, builders, and developers — a single source of truth for land, projects, partners, and money across the full sale/purchase lifecycle.

- Tested the core Stock → Project → Subproject → Unit → Sale chain, validating land holdings, layouts, and unit-level sales tracking.
- Validated partnership and partner ledgers — holding percentages, capital calls, contributions, withdrawals, and due settlements.
- Verified bank-transaction mapping and GST/TDS handling to ensure every transaction traces back to a partner, project, or employee.
- Tested role-based access and scoped visibility across roles (Admin, Partner, Accounts Staff, Sales Head/Staff) to confirm data-level restrictions.

25YearsMore — Social Networking & Community Platform — Tester

Community platform empowering individuals aged 50–65 through pathways, events, and coaching for their next life chapter.

- Performed end-to-end manual testing across the communities, events, and coaching modules.
- Verified UI behavior for sign-up, login, and the Life 2.0 readiness assessment flow.
- Tested community engagement features — joining, posting, and browsing — across the Learn, Earn, Grow, and Give pathways.
- Logged and tracked defects using Jira and Bugasura through each release cycle.

INTERNSHIPS & TRAINING

Web Development Intern | Yakkaservices (Yakkaspace)

Jul 2024 – Oct 2024

- Worked on modern web development using React.js, Next.js, Tailwind CSS, and Supabase; built and tested responsive UI components.

Web Development Trainee / Intern | SAIO

Oct 2023

- Completed training in HTML, CSS, JavaScript, React.js, and WordPress (Oxygen Builder); achieved 96% in the final assessment.

Java Development Intern | Shiash Info Solutions Pvt. Ltd.

Apr 2022 – Jun 2022

- Worked with the technical team on Java-based development tasks, gaining core Java and application development fundamentals.

EDUCATION

- Full Stack Development Certification — 6-month Front-End Web Development training, Besant Technologies, Chennai (Velachery).
- Diploma in Cinema Editing and Visual Arts — PALME-DEOR Film and Media College, Thanjavur — 89% aggregate, 2020.

ACHIEVEMENTS

- Improved test coverage across critical modules through effective test case design and execution.
- Reduced release-cycle defects by identifying and addressing issues early in testing.
- Successfully managed 3 concurrent projects (Vruksha, Varai, Eythio) ensuring timely delivery and quality.
- Promoted from Junior Quality Engineer to Associate Quality Engineer to SDET within 18 months.
